### SUMMARY

Passionate about mastering cybersecurity as a comprehensive field, my career goal is to become a Security Architect. I'm currently advancing my skills in penetration testing, eager to contribute to robust digital security from all angles and make a significant impact.

### EDUCATION

**Karabuk University**

2020 - 2025

Computer Engineering

### EXPERIENCE

**ÖLÇSAN INC · Remote Internship**

Aug 2023 - Sep 2023

- Linux OS Basics
- Networking Basics
- ISO 27001 Basics
- Penetration Testing Process Fundamentals

**Ema Security - Enternship**

Aug 2025 - Sep 2025

- Information and Leaked Data Gathering Of Real Applications
- Web Application enumeration
- Web Vulnerabilities: SQLI , Command Injection , Path Traversal
- Vulnerability Scanning with Nessus , ZAProxy , Netsparker
- Burpsuite Basics
- Brute Force Attacks & Hash Analysis

### PROJECTS

#### • Real-Time Trap system Log Visualization System

May 2025

- Built a real-time cloud-based dashboard for a Trap system to detect and analyze unauthorized access, displaying attacker data while gaining experience in firewall configuration and Apache2 setup.

#### • Simulated SIEM Operations on LetsDefend

Aug 2025

- Gained hands-on experience with SIEM using the Let's Defend dashboard, correlating security alerts and analyzing real-time threats to enhance incident response skills.

### TECHNICAL SKILLS

### LANGUAGES

- Programming: Java, Python, Bash Scripting
- Database Management: (MySQL, Oracle Database)
- System Administration Of Linux OS
- Writing Security Reports

- Arabic: Native
- English: Intermediate
- Turkish: Advanced
